

Meeting with the Committee of Education

- Student Liaison Officer

Julia Nordberg, our student liaison officer at Uppsala Student Union, informed the committee on her job and how UPaD can make use of her to enhance our cause.

Furthermore the committee and Julia discussed the future work of 'studerandeskyddsombud' that was elected by the Student Union last year. The responsibilities of this role might be changing the coming year, but nothing has yet been decided. The Union will give more information on future of the 'studerandeskyddsombud' as it comes up.

- Election of representatives to Samsek

The committee decides to announce the election of the representatives to Samhällsvetenskapliga Sektionsrådet, which will be decided by the committee.

- Board meeting, Department of Peace and Conflict Research

The committee discussed the agenda for the board meeting 14-10-13.

The point of the agenda regarding the internship course provoked many thoughts and a fruitful discussion. The committee asked questions such as:

What happens to our CSN if we fail our thesis and are interning?

Why should we not be allowed to decide ourselves when we are interning?

If the proposal is accepted, could this perhaps be delayed for another semester so that it does not affect the students that are already planning to intern this coming spring.

The student representatives will put forth this discussion to the board.

- Board meeting, Department of Government

The committee discussed the 'skrivelse' to the board regarding the language of education at the development courses. The student representative will fight for our cause at the board meeting.

- **Study-programme**

Everyone seem very happy about a future study-programme, both within and outside the committee, and as such the action-group will take the project further very soon.

- **Information on all things university business**

The Head of Education aim to make information on all the different elections and bodies within the university available for all of UPaD's members.

- **Regarding examinations at the Department of Peace and Conflict Research**

Students the last three years have been disappointed with the standards of hall exams 'tentor' at the department. The halls are often too small and the exams have been managed in an unprofessional way. The student representatives will lift this to the board meeting by 14-10-13.
